

## **REPORT ON A THREE DAY DEVELOPMENT OF MONITORING AND SUPERVISORY TOOLS**

On the 28<sup>th</sup> to 30<sup>th</sup> of August, 2017 a three day meeting was held to develop monitoring and supervisory tool for the WDF16-1368 Project. The meeting aimed to provide a monitoring and supervisory framework to track the progress of the WDF16-1368 Project on Diabetes and Hypertension Prevention, Care and Management.

In his welcoming remark, Mr. Sanjally Trawally, Deputy Director Health Promotion and Education, welcomed the participants and thanked them for their response despite the short notice. He also reminded them that the development of monitoring and supervisory tools is a very important aspect of the project, because it will enhance the units ability to track the progress made in diagnosing and managing diabetes and hypertension by the project. It is high time for a comprehensive framework to be developed to facilitate effective monitoring and evaluating.

Mr. Modou Njai, Director Health Promotion and Education, in his opening remark said diabetes and hypertension is dragging many families into poverty and has many other consequences including the loss of valuable human resources. He added that we should all cherish the WDF16-1368 Project, as it aims to complement government efforts in the fight against diabetes and hypertension.

The session was facilitated by the Fatou Sagarr Jagne, Program Manager of the Monitoring and Evaluation Unit and her team. She presented a working monitoring framework tool, which was used as a guide to develop the framework and plus two monitoring checklist for the health facility and community.
